Dear Ms. Segraves :

This letter is to acknowledge your Notification of Tank Closure as received July 14, 1989.

The results of the required assessment (40 CFR, Part 280.72) should be submitted to this office no later than thirty (30) days after the tank is closed. The information in the attachment is requested so that the Winston-Salem Regional Office staff can evaluate whether the owner and operator has adequately measured for the presence of a release where contamination is most likely to be present at the UST site.

If there is evidence of a release or suspected released, it must be reported within twenty-four (24) hours.

Groundwater Section staff will be conducting random site visits to ensure that UST closures are conducted as required in 40 CFR, Part 280.71. Any violations will be submitted to the EPA with a request for enforcement.

You may contact John Stewart or me at the letterhead address or telephone number if you have any questions concerning these requirements.

Sincerely,

Emily F. Gloeckler
